

## CAAS SAR / EASA Part-66 M15 Gas Turbine Engine

### Course Description

This course is compliant with the requirements of CAAS SAR / EASA Part-66 and provides participants with a strong foundation in aerospace engineering.

### Course Objectives:

- Understand in-depth construction and operations of turbojet, turbofan, turboshaft and turboprop engines
- Description of Auxiliary Power Units (APUs)
- Identify and relate main core engine parts
- Description of secondary systems of the engine such as bearings, lubricants, fuel and air.
- Power plant installation, engine monitoring / ground operation and engine storage / preservation

<b>Course Duration</b>	B1	26 Training Days
------------------------	----	------------------

<b>Maximum Class Size</b>	28 students
---------------------------	-------------

<b>Course Fees</b> <i>(Singapore Dollars per seat)</i>	\$4200
---	--------

<b>SDF Subsidy</b> <i>(For CAAS approved course only, subject to eligibility)</i>	\$300
--	-------
