

## Sheet Metal Structures Maintenance Level 1

### Course Description

This WSQ funded course provides participants with basic knowledge on sheet metal tools, machines, fasteners and the application of various techniques of sheet metal fabrication using safe work practices.

### Course Objectives:

- Learner will be introduced to different types of minor sheet metal surface defects and the repair procedures and processes in accordance with maintenance or technical manuals.
- Identify different types, characteristics and causes of surface corrosion, and determine the chemical or mechanical methods of removal.
- Interpret engineering drawings for the fabrication of sheet metal parts.
- Introduce and explain the different types and uses of sheet metal tools and equipment.
- Understand and explain the different techniques of sheet metal fabrication
- Identify the different types and uses of fasteners. Explain the installation and removal methods in accordance with maintenance or technical manuals.

<b>Course Duration</b>	7 training days
<b>Maximum Class Size</b>	Theoretical 20 students / Practical 10 students
<b>Course Fees</b>	Kindly contact the Training Centre
<b>SDF Subsidy</b>	WSQ Course Fee grant and Absentee Payroll, as applicable
